HTML – Forms

Introduction

Everything you need, for only \$10 a month.

Try our Virb FREE for 10 days. No payment necessary. Cancel anytime.

Build, customize and fall in love with your new website. No pricing plans. No hidden fees. No pressure to pay unless you are completely satisfied. Your first 10 days are on us. Our treat.

Your Site Name:

What will your site be called? (ex: your name, band name, company name, etc.) Don't stress. You can change this any time.

Your Site Link: .virb.com

This will be your website address; it must be 3-55 characters long (only letters and numbers). Once signed up, you can add your own domain at any time (ex: yourname.com) or you can keep this one forever. It's your call.

Your Email Address:

Confirm Email Address:

Pick Your Password:

☒ Why yes, I agree to Virb's Terms of Service

- A form is a way to send information from a browser to a server
- All the components of a form appear as the content of <form> tag
 - The components are called *widgets* (e.g., text boxes, radio buttons and checkboxes)

Syntax:

```
<form list_of_attributes_and_values>
    <input element>
    ...
</form>
```

Important attributes of the <form> tag

- Method
- Action
- Target

Example:

```
<form method="post" action="survey.php" target="_blank">
    <input type="text">
    ...
</form>
```

- Input widget can be any of the following types
 - Text
 - Textarea
 - Button
 - Checkboxes
 - Radio Buttons
 - Dropdown list
 - Hidden
