## **Department of Computer Science & Engineering**

### **Web Technologies**

#### **Assignment – CSS Box Model and Position**

Further beautify the profile created by using box properties like border/margin/padding to improve the spacing between elements (like list elements/table cells). Also, position the interests and online profiles next to each other as follows using <div> tags

Interests:

1. A
2. B
3. C

Online Profiles:

- A
- B
- C
