

# **PES UNIVERSITY, Bangalore**

(Established under Karnataka Act No. 16 of 2013)

## **Department of Computer Science & Engineering**

### **Digital Design and Computer Organisation**

#### **Question Paper Format**

1. The maximum marks will be 60 and the exam duration would be two hours.
2. There will be six questions, two questions per unit, average 10 marks per questions, all questions being compulsory.
3. Each question will be subdivided into a maximum of three sub-questions.
4. It is unlikely that there will be single questions worth many marks. As a result some of the sub-questions may be further divided into sub-sub-questions.
5. Marks will be specified only at the sub-question level. Sub-sub-question marking scheme may be shared later.
6. Significant number of questions would be of objective type. If, for example, you are asked to identify a logic structure or draw a circuit diagram, simply writing the correct structure name or drawing the correct diagram would fetch full marks. There is no need to provide explanation unless the question explicitly asks for it.
7. While the quiz and question bank can provide some idea, the questions would be designed to test your understanding of the concepts taught.
