Question Bank – CSS Box Model and Position

3. What is the significance of the `` and `<div>` tags with regard to styling?

`` is used to style a part of the paragraph.

Example:

```
<p>This is an <span style="color:red">important</span> message.</p>
```

`<div>` is used to group a set of elements and apply style uniformly to all elements under it.

Example:

```
<div style="text-align:center">
    <h3>...</h3>
    <p>...</p>
</div>
```
