Question Bank – CSS Box Model and Position

1. With a neat diagram briefly explain the CSS Box Model.

2. What are the different ways in which an XHTML element can be "positioned" using CSS? Explain with an example.

3. What is the significance of the <span> and <div> tags with regard to styling?

4. Add a logo to a HTML page. The logo should always remain in the top right corner even if the page is scrolled. Set the position property accordingly.
