## Question Bank - CSS

1. Write the three different ways in which styling can be applied in HTML.
2. Write CSS rules for the following
   a. All <p> elements which are immediate children of any <div> must have the text colour set to blue and background set to yellow
   b. All hyperlinks must blink when the mouse moves over them.
3. Give examples for different types of selectors in CSS.
4. For any of the table created by you, apply the following CSS rules
   a. All table headings with class "important" are displayed in red colour
   b. All other cells have a blue text
   c. Hover over any cell of the table changes the background colour to yellow
5. Why are styling rules called as "cascading"?
